Connecting Communities to Public Lands

Project Title	Connecting Communities to Public Lands
Droiner Silmmary	Help share our story to connect communities and visitors to their public lands to enhance stewardship and protection of these unique resources.
Country	United States

Project Description

The Dixie National Forest is located in southwestern Utah surrounded by the beauty and wonder of 5 National Parks and Monuments. The forest is rich with natural, cultural and historical significance. The forest's Public Engagement Team is seeking assistance to implement the Interpretive Master Plan by developing programs based off five categories of significant stories, supporting themes, and subthemes all umbrellaed by our central interpretive theme: The Dixie NF displays a contrast in color, climate, and culture through its geology, world class recreation and scenery, and natural and heritage resources. As a member of the Public Engagement Team you would be responsible for attending and participating in virtual meetings and conference calls, organizing data of current interpretive panels forest wide, developing interpretive programs based from the central theme that can be catered for diverse audiences ranging from university students to visitors, and most importantly, strengthening and developing new partnerships to help share our story.
